

PSE&G

PSE&G Electric Delivery
4000 Hadley Road
South Plainfield, NJ 07080

June 4, 2013

Dear Neighbor,

For the past 10 years, PSE&G has been recognized as the Mid-Atlantic Region's most reliable electric utility. In order to maintain this tradition of excellence, we will soon be making improvements to the regional electrical system in your area.

PSE&G's Southern Reinforcement Project is a system upgrade project that will help ensure reliable electric power for the southern New Jersey region by providing additional transmission lines and station upgrades in the area.

This upgrade will help ensure safe and reliable electric supply to the stations that provide electric service to residents, businesses, and civic facilities in the area. You are receiving this letter because the installation of underground transmission line(s) will occur in your area, may begin in the next few weeks, and will continue through early 2014.

The upgrade involves the installation of an underground electric circuit between two of PSE&G's electrical stations. Work will occur in public rights-of-way and will include excavation, the installation of steel pipe and manholes, welding, backfilling, and temporary and final paving. Once the pipe is installed, crews will install cable between manhole locations and splice the cables in the manholes.

Some of this work may require crews to work extended hours to complete.

This work will occur in the following areas:

Cherry Hill: Hampton Road, Cuthbert Boulevard, and Wisteria Ave;

Merchantville: Lexington Avenue and North Chestnut Avenue

Pennsauken: Wisteria Avenue, Lexington Avenue, W. Walnut Avenue, Horner Avenue, Rogers Avenue, N. Center Street, Irving Avenue, and Bethel Avenue.

Additional upgrades will occur in each community over the next few years as part of this program.

The work will be performed by reputable contractors under the supervision of PSE&G. The contractors will adhere to all PSE&G safety and environmental standards and procedures, and work diligently with local police to minimize traffic disruption.

We will do everything feasible to complete our work expeditiously while maintaining the highest levels of safety for all involved or impacted by the project. During construction, we ask that you refrain from entering our work zones, both for your safety and the safety of the crews.

If you have any questions about this program or would like additional information, please feel free to contact our toll free program hotline at (866) 507-5961. Additional information can be found on our website at www.pseg.com/srp.

Sincerely,

Tim Erway
Project Manager
