

PSE&G Electric Delivery
300 New Albany Road
Moorestown, NJ 08057

September 20, 2013

Dear Resident,

PSE&G will soon be constructing underground utilities in your area to help ensure safe and reliable electric service. Over the next several weeks, construction and road opening activities will be taking place on Lexington Avenue between West Maple and Wisteria Avenues.

Due to the high water table along Lexington Avenue, we will need to conduct dewatering activities during construction. This will consist of water receiving tanks and well points located along the east the curb line.

This will be a manned, 24-hour operation with local police protection and supervision. All driveways and roadways will remain open to local traffic for the duration of the work. There are no planned interruptions in electric service as a result of this project. We will do everything feasible to complete our work expeditiously while maintaining the highest levels of safety for all involved or impacted by the project.

If you have any questions about this project or would like additional information, please feel free to contact our project hotline at 866-507-5961.

Sincerely,

Douglas Anthony
Project Support Manager
PSE&G
