

This year Parks and Playgrounds will need to make a few changes due to continuing guidelines set forth for the pandemic.

**Please take note of these changes and let us know if you have any questions. Thank you.**

- If your child is feeling ill for any reason please keep them home, we do realize they enjoy coming but this is for everyone's safety.
- Temperature will be taken daily. If your child has a fever you will be asked to take them home at that time.
- Children must wear masks indoors, so please send your child with a mask every day. They will not need masks outside.
- Please be sure to **check email messages and text and phone messages while your child is at Parks and Playgrounds**. Please notify us if a number or email changes during the program so we have correct information for all children for emergencies.
- **Rainy days** will be a challenge this year due to limited indoor space! This year we are asking if it is raining that you **do not** bring your child. It is likely that we will be **canceling** for that day. **Should it start raining after arrival we ask that you come and pick up your child.**
- Please **send** your child with a **water bottle and a snack**, we will not be providing extra snack this year. We will be refilling water bottles and making sure the children stay hydrated.
- We are asking that you keep us informed about any cases of COVID in your families or if your children have been exposed to anyone with COVID.
- Since the program is only 5 weeks there will be no refunds or make up days for time missed.

**We want this to be another fun filled program and appreciate your cooperation with these and any other changes we may need to make. Thank you!**
